

Work Sector Retail
Client BHS
Location Liverpool
Cost £3.6 million
Date September 1999

BHS contractors in Liverpool required a 20,000 sq ft extension to an existing store, combined with a complete store re-furbishment. The design exploits the corner situation on a junction of narrow streets in an area of old brick warehouses. The interplay of angles, created by the exposed planar glazed entrance on the corner of the street, is enhanced by angled escalators and a 10 metre wide bridge link over the road. The design incorporates a new restaurant concept on the ground floor.
